

Your Partner in Recovery

Homecare services would like to be your partner in recovery. We offer a smooth transition of care from physician or hospital to home services. Care begins with a phone call; soon after that nurses, aides and/or therapists will visit the patient at home to provide the needed services. Pennock Homecare will handle all of the billing, relieving you of paperwork concerns. We accept assignment from Medicare and Medicaid and participate with Blue Cross/Blue Shield and many other private insurances.

Pennock Homecare now brings modern medical technology into your home. Today, hospital stays are shorter and therapies are highly specialized. Homecare services often permit earlier hospital discharge with many therapies being performed at home. This allows for healing and teaching of therapy in familiar, comfortable surroundings, enhancing privacy, independence and a partnership in recovery.

Pennock Homecare Services does not deny admission to persons with a contagious disease including, but not limited to HIV, MRSA and Hepatitis B unless otherwise directed by the State Health Department. Patients will be accepted regardless of race, religion, color, national origin, age, gender, sexual orientation, height, weight, marital status or disability.

Your Health Matters
